New!

New style facade

Timber Trend Facade uniquely replicates Wooden Log Panels. The exceptional shape and quality achieved by this Cladding will fulfil the expectations of the most demanding customers by giving buildings an individual and extremely pleasing character. Because the Panel is also insulated it will retain its form and shape throughout its extensive life.

Timber Trend advantages

Timber Trend is an extremely tough and long lasting Cladding.

Timber will not dent, peel, flake, rust or corrode, will hide scratches and is virtually maintenance free.

It is available in two colours: light oak and dark walnut.

This Facade is easily applied regardless of weather conditions throughout the year.
